

STEEL WORKER™

"A GAME
OF STRATEGY"

©TAITO CORP. 1980

(1)
Just one more
connection and you
win!
Can you select and
connect in time?

(3)
Oops!
You just lost your
steel worker.

(2)
You did it!
Congratulations.

(4)
The more girders
you use the higher
your score!

Manufactured by

A game of strategy. In this new Taito game, the player becomes a chief engineer at a construction site. The player must build a bridge of steel girders so that the steel worker may walk safely across the site.

In order to do this, player must select the right size girder (out of many different sizes) and the right direction and location for the girder. Delay or hesitation is very dangerous. If you are not quick enough in your selection the steel worker falls and you lose.

PLAY INSTRUCTIONS

- * Insert coin (s).
- * Select game for one or two player.
- * Joining steel frames let workers move from left to right.
- * Use control lever to select proper steel frames out of samples.
- * Push select button to join steel frames.
- * Pushing reverse button will turn worker.
- * Worker can turn nine (9) times.
- * Joining a steel frame scores 50 points.
- * Worker can join up to 15 frames to get a goal.
- * 4 workers per game (game ends when the 4th worker falls)

SCORING

- * Each girder you connect -- 50 points
- * Successful crossing scores bonus points.
- * Bonus points are awarded as follows:

1st frame	100 points
2nd frame	400 points
3rd frame	200 points
4th frame	200 points
5th frame	300 points
6th frame	300 points
- * Up to 1,000 bonus points can be scored for one crossing.

ADDITIONAL INFORMATION

- (1) Since 50 points are scored for every girder that is connected, if you can build your bridge using more girders, you will get a higher score.
- (2) Steel worker's walking speed accelerates at random -- make your selection quickly.
- (3) If you think steel worker is on collision course with elevators, use reverse button to give you more time.
